4" RUBBER BAND & TRAY TAG HEPA VACUUM

This 20-gallon HEPA Vacuum with a 4" and 2" independent inlet, with triple motor system is designed to handle the most difficult Postal cleaning operations, including rubberbands and tray tags in semitrailers.

HEPA Vacuum for Tray Tags

This vacuum efficiently cleans tray tags off semitrailer floors, docks, or workroom floors around automation equipment. The vacuum is currently being tested as a centralized vacuuming system. Due to the suction strength of this vacuum, the pre filtration module with attached pressure relief hose has been added to keep the canister bag in place. Also, a metal Gulper, sold separately, attaches to the hose end for easy, more ergonomic handling. The vacuum unit is not conductive and should not be used directly on mail processing equipment.

Features

- Three individual motors - a total of 23.4 amps
- 250 CFM
- 106" of water lift
- Riser with 2" and 4" inlets
(2" for general cleaning, 4" for rubberband and tray tag cleaning)
- 20 gallon structural foam drum
- 4" x 10' hose
- Dolly for easy transport
- 42' long, 3-prong power cord
