## GENERAL PURPOSE CUSTODIAL VACUUMS

These HEPA vacuums meet U.S. Postal Service specifications for general custodial cleaning of post offices without mail processing equipment and facilities with workrooms. Listed vacuums are not ESD safe and are not approved for mail processing cleaning. Please see the mail processing vacuum section for ESD safe vacuums. All featured vacuums filter down to the .3-micron range and feature an assortment of attachments to effectively clean your post office. These diverse vacuums feature sizes and prices that will meet your facility's needs.

### **.3 Micron HEPA Vacuum-U.S. Postal Service Approved For Custodial Cleaning**

This lightweight, portable dry vacuum features a 4 gallon tank and a HEPA filter before the motor (non-bypassing, 2 stage, 1.3 Horsepower, and 115V). The state of the art HEPA filtration system filters .3 microns and greater. Includes a suction hose, 35 ft. cord, 24"-36" adjustable telescopic wand, 12" floor tool, 3" brush/nozzle, and 11" crevice tool. Also comes with 3 ply dust filtration collection bag and includes a plastic canister bag for disposal purposes. Includes one small filter and a HEPA filter with a bag lock clip to lock your collection dust bag in place. Unit tracks behind user and will not tip over like other upright models because of its three durable casters. Includes a five-year manufacturer warranty that can be serviced at hundreds of factory service centers nationwide. Vacuum measures 18 1/4" x 12 1/2" x 15 1/4". Unit is approved for general custodial cleaning and is not conductive.
