

# USPS Mercedes Metris Rear Facing Quad Flash Kit

Kit Number: N1035050 eBuy number: 117650

N1035050 Rear Facing Quad Flashers (RFQF) kit; an after-market installation to increase the visibility of the USPS Mercedes Metris vehicle during street delivery operations. The RFQF consists of two rear facing modules with 6 individual LED's, mounting brackets, wiring, wiring connections, dashboard switch housing, switch, and in line fuse.

LED's are operated by the driver, and can be activated with a toggle switch mounted on the dash. The LED's are wired with continuous power, allowing the vehicle ignition to be off while in use. Keys can be completely removed from the ignition.

Power consumption is low and use without vehicle running is encouraged.

LED modules are preset to 1 specific quad flash pattern, as approved by the USPS, and cannot be adjusted by the driver. Installation of components are at specific mounting points in the delivery vehicle. Installation time is estimated at 60 minutes per vehicle. Kit contains all components required for proper installation.
